

SMART INDIA HACKATHON

Ministry/Organization Name/Student Innovation :	Ministry of Rural Department
Problem statement Code :	SH1007
Problem statement Title :	Mechanism to help rural people to self-select for receiving benefit offered under Govt. schemes and offer himself to be tracked using a unique identifier
Team Name :	SKYRAS
Team Leader :	Karn Tiwari
Institute Code (AISH) :	U-0085
Institute Name :	Guru Ghasidas University, Bilaspur, Central University Chhattisgarh

Target Population

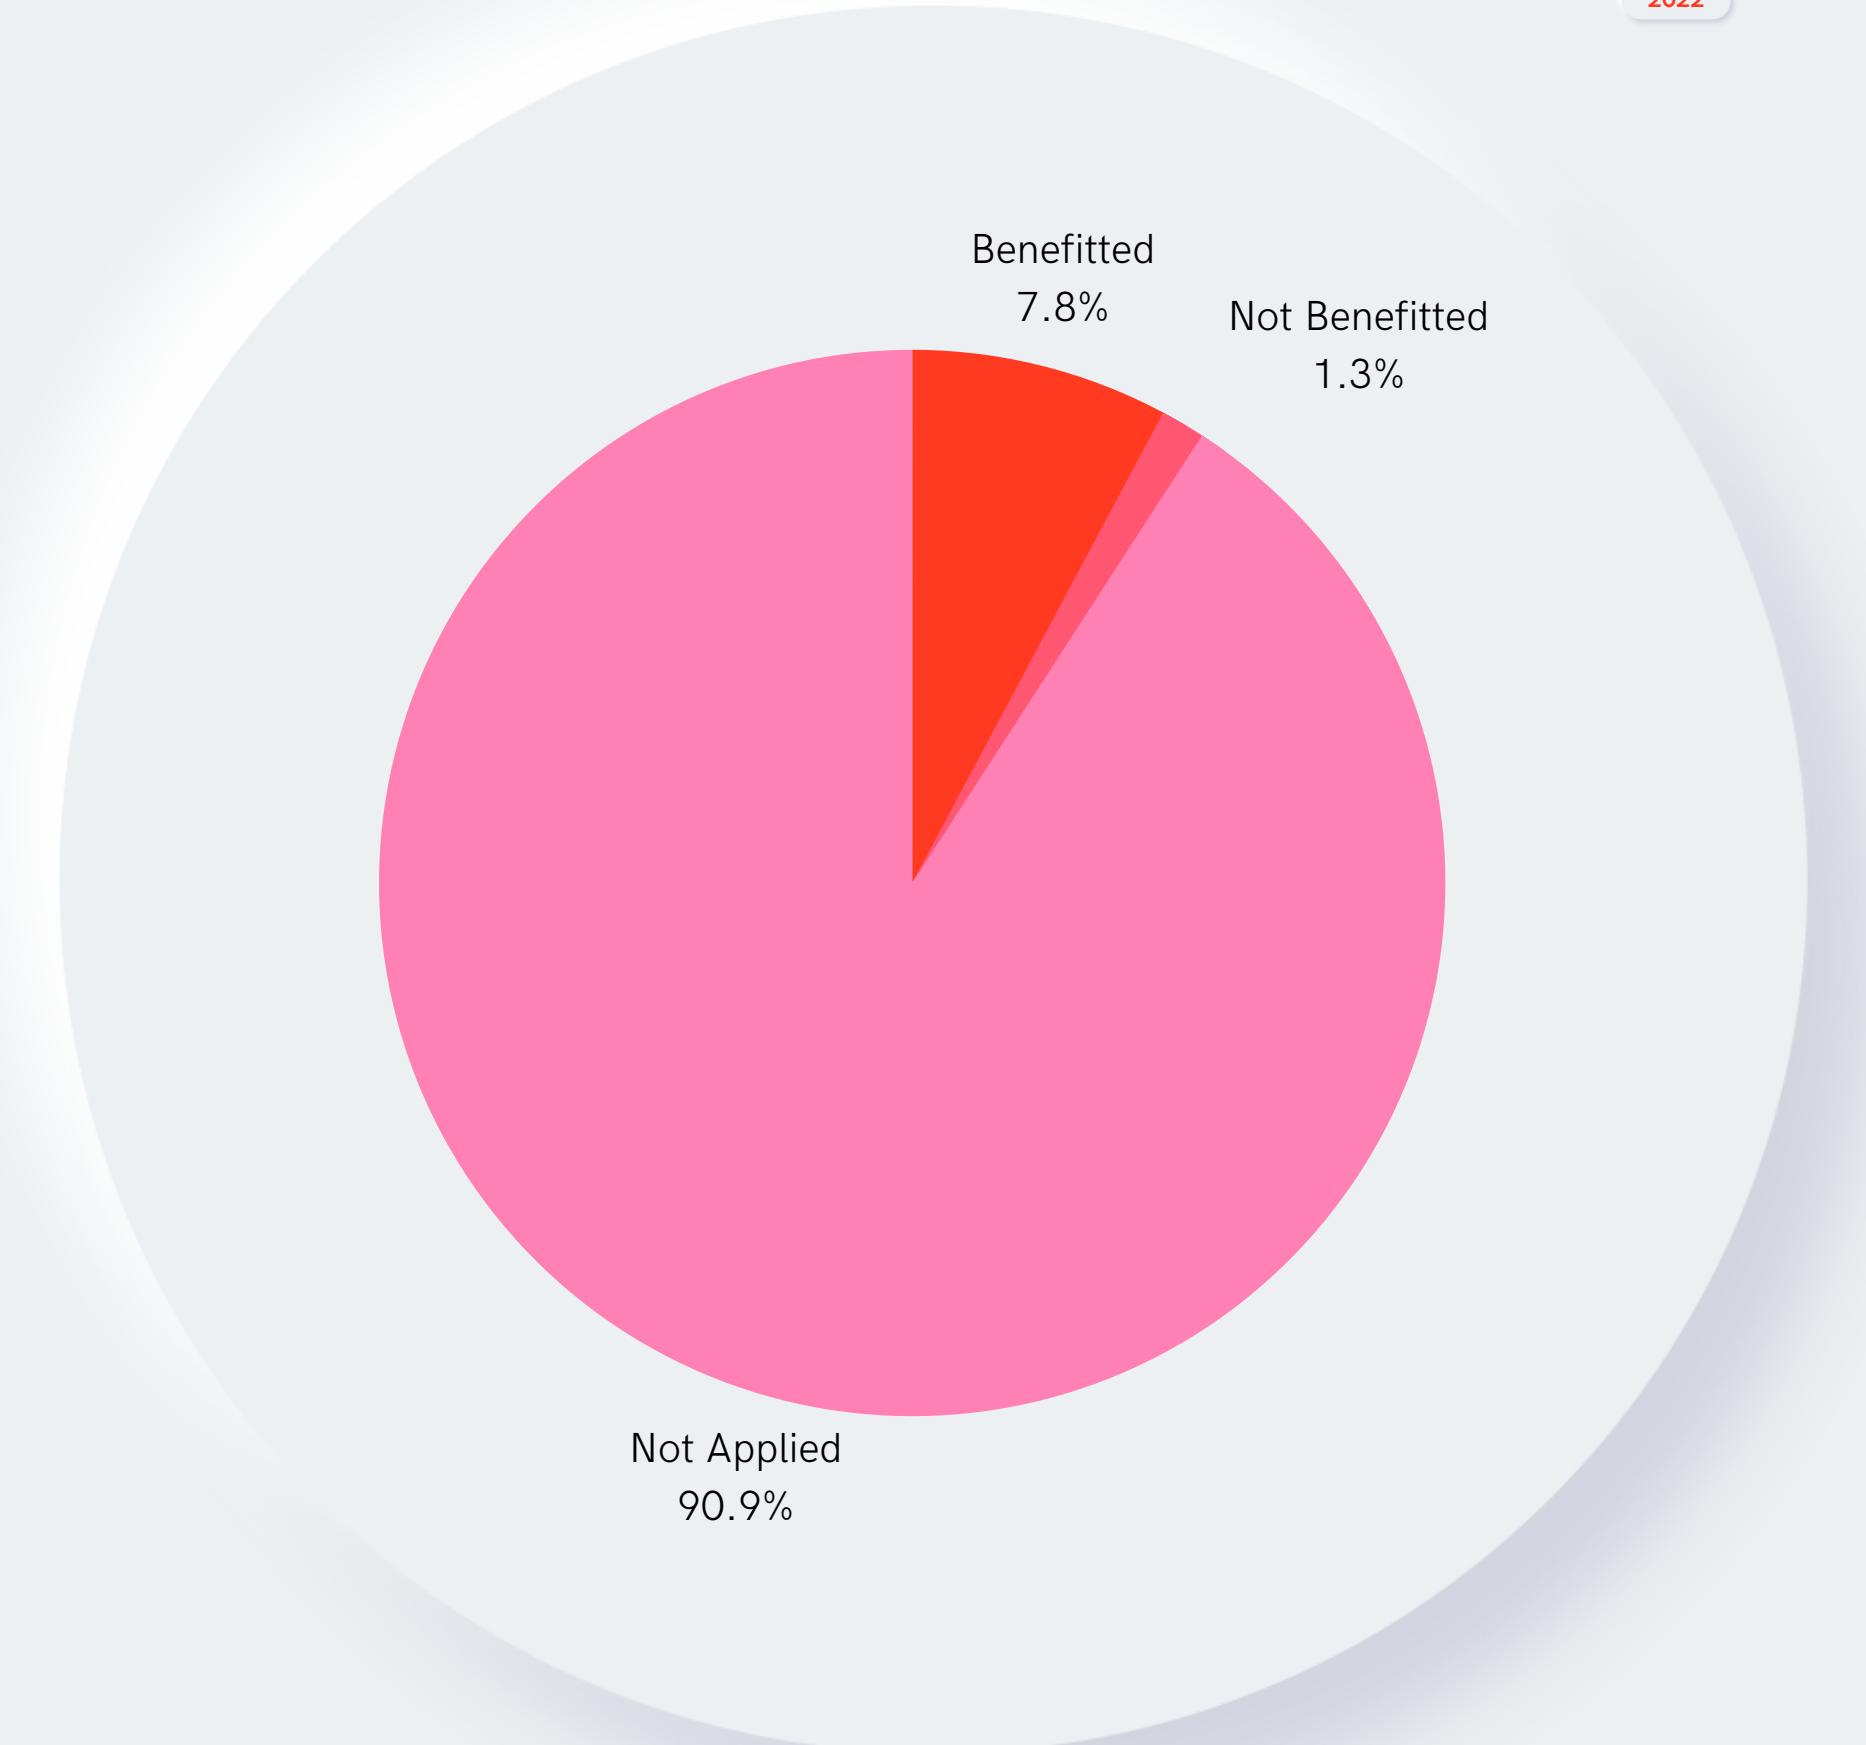

Pradhan Mantri Maan Dhan Yojna

Target population : 2 crores

Registration: 1829469

Not benifitted: 2.69 lacs

Reasons: lack of confidential land documents.

Understanding problem

In the existing scenario, the approach followed for beneficiaries is top-down. A system is needed where beneficiaries get into the scheme and track themselves by unique identifier ID. Central and state governments launched many schemes for rural development but how many schemes reach the bottom in reality? The Percentage is very low

Mainly Three Bottlenecks are:

- **Lack of awareness -**
- **Gross Corruption -**
- **Inefficient Scheme - Implementation**

The majority of the population is not aware of most of the schemes that's why actual needy people not get benefited

It takes time and money in the form of commission for approving or certifying any documents.

This inefficiency in delivering the schemes does not only affect the people but also the government

Solution Approach

- An interactive website
- supports e-governance model .
- Single click benefits
- Eradication of bureaucracies and corruption.
- Schemes filtration.

The platform is modularized and provided access according to role and responsibilities:

Public users:

- Registration
- Notifications.
- Scheme tracking

Government:

- Data collection
- managing data
- review the applications
- statistical reports
- Database
